

AST-Technical parameters of mobile ultraviolet equipment

1. Equipment Name: Mobile UV Germicidal Lamp Cart, with complete qualification certificates.
2. Specifications: Model AWS-II
3. Power Supply: 220V±20% 50HZ
4. Lamp Power: 30W x 2
5. UV Wavelength: $\geq 253.7\text{NM}$
6. UV Radiation: Single lamp $\geq 107\text{UW}/\text{cm}^2$, Double lamp $\geq 214\text{UW}/\text{cm}^2$
7. Adjustable Lamp Angle: 180 degrees
8. Electronic Panel on the Disinfection Cart: Timer available for 15 minutes, 30 minutes, and 60 minutes.
IV. Standard Configuration
1. One portable ultraviolet ozone generator
2. Two lamps
VI. After-sales Service (Warranty Period, After-sales Repair, Training, and Usage Requirements)
1. The equipment is covered by a one-year warranty, and the lamps are covered by a one-month warranty, calculated from the date of acceptance. A comprehensive after-sales service system is in place during the warranty period.

2. After turning on the disinfection lamp, personnel must leave immediately. Do not look directly at the lamp. The ultraviolet light intensity is very high when the lamp is working, which can damage the eyes and skin of humans/animals, as well as plants. It must be used in an unoccupied environment. After sterilization, the ultraviolet lamp vehicle does not require ventilation. The ultraviolet lamps must not be used as lighting fixtures! Please ensure proper use!
